

Project Name: _____
Part Number: _____ Date: _____

Features

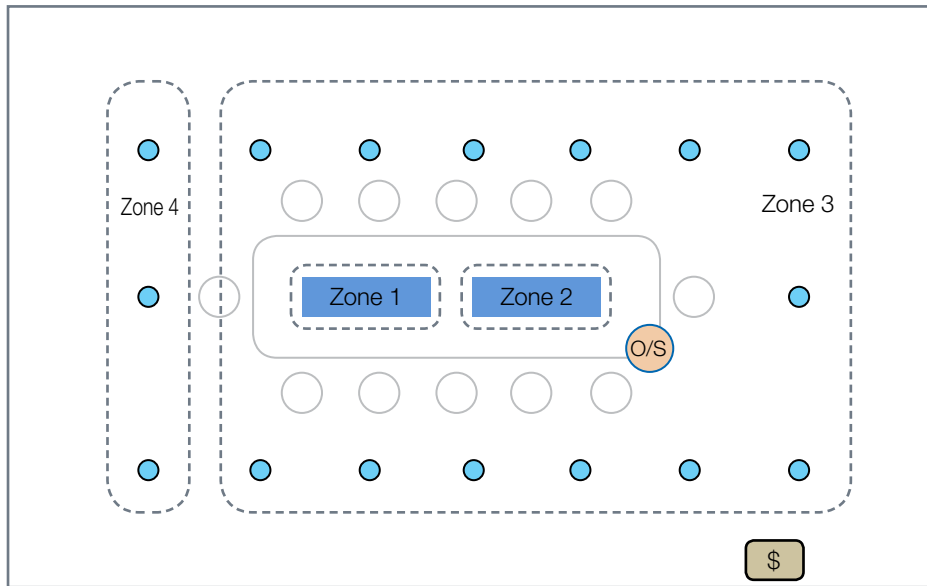

- Wireless lighting control console
- Wall or table mounting hardware
- Preset scenes
- Manual control
- Control up to 8 zones

Provide customers with a touch screen solution for controlling lights in conference rooms. The control console App operates on a Apple iPad Mini to set and adjust lights that are controlled with the **Bluetooth®** Wireless ecosystem. Specifically designed for conference rooms, the conference room app allows users to set preset scenes, manual control zones, lock settings, and use a dark or light background design.

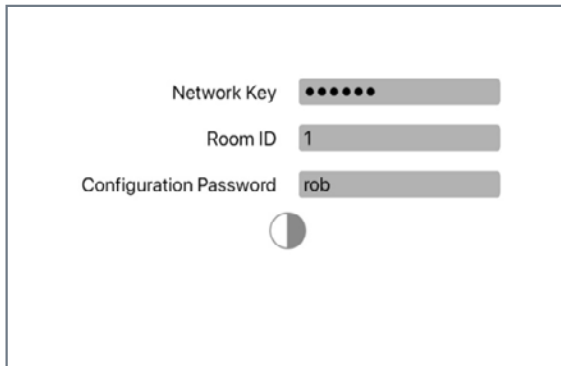

Select the iPad and mounting solution that meets your room requirements, then download the Douglas Lighting Controls Conference Room App from the Apple App Store. The wall mount can be used in place of wall station switches or have a table mounted control solution using the LuxePort mounting bracket.

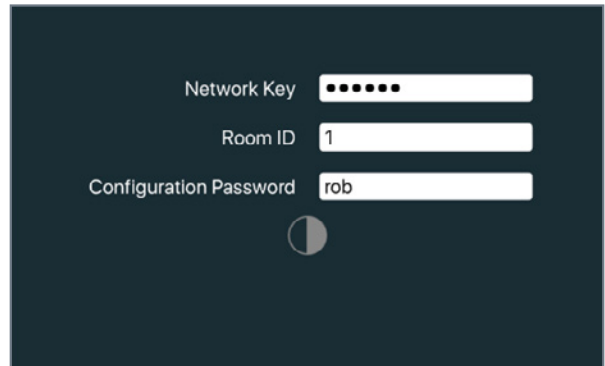

PART NUMBER	DESCRIPTION
